Re Dr Limci Gupta

To whom it may concern,

Dr Gupta reports cervical pathology cases for us including cervical screening biopsies and LLETZ procedures through LGpath.

She reports greater than 150 cervical specimens per year and attends at least three colposcopy MDMs per year. She keeps up to date with her biennial cervical update training.

Dr Gupta takes care to produce a thorough report which includes correlating with the clinical situation. I have audited her work and reviewed several cases at MDMs and have found no cause for concern.

Dr Gupta is an excellent communicator. She requests a further opinion when necessary and responds well to feedback.

Yours sincerely

Dr Anna Bryant
